Exhibition Theme

“Clash & Convergence” focuses on the visual electricity created when red and blue meet. We are looking for pieces that highlight the intense pop of these colors against one another—the heat of red against the cool of blue. This show is about contrast and balance. Think of fire and ice, the neon glow of a city night, or the bold geometry of primary colors. Show us how these two shades fight for attention, harmonize in the shadows, or create a vibrating energy that demands to be seen.
